INSTALLATION TIME & SKILL LEVEL:

15-20 minutes, Skill Level 01

WARNING!

Be sure all hardware is secured according to instructions. Attachment hardware can loosen over time. Check before each use, and tighten if necessary.

Do not exceed the maximum load specified for each cargo bag, accessory or the maximum load recommended by the vehicle manufacturer.

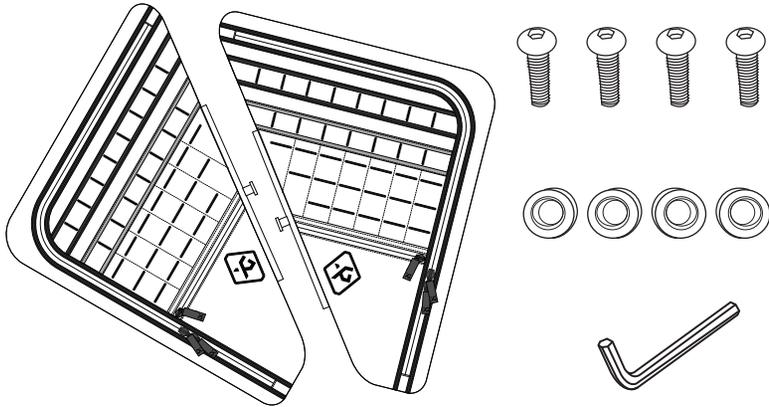

Do not load more than 8lbs of cargo in each bag.

MAINTENANCE

The cargo storage components should be carefully cleaned and maintained. Use only a solution of water and soap without any alcohol, bleach or ammonium additives. Periodically inspect cargo storage components for damage. Replace lost, damaged or worn parts. Use only original spare parts obtained from a stocking specialist, dealer or manufacturer. Any changes made to the cargo storage system and components as well as the use of spare parts or accessories other than those supplied by the manufacturer will lead to the lapsing of the manufacturer's warranty and liability for any material damage or accidents. You should observe these instructions to the letter and only use the original parts supplied.

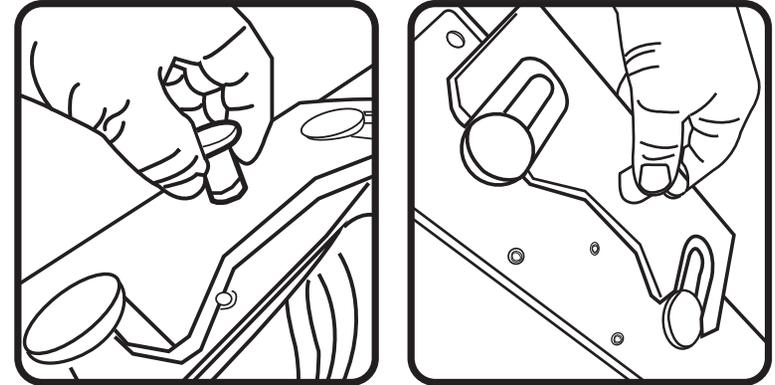

STEP 01:

Remove all components from box.

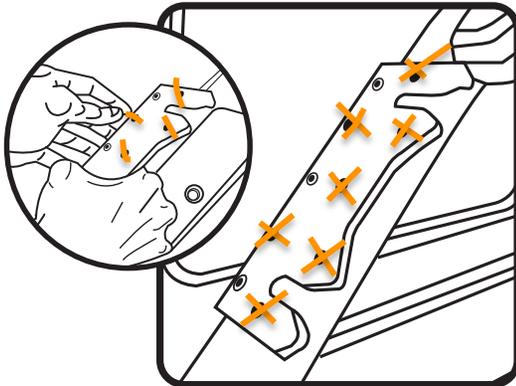

STEP 02:

Pull locking knob and turn until it locks fully open. Remove mounting plate from bag.

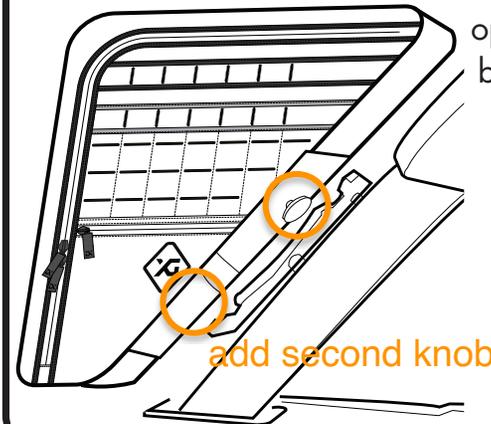

STEP 03:

Using two provided socket head bolts and spacers per side, install each plate as shown with spacer between the plate and sportsbar. Tighten securely. User responsible for securing mounting plates before operating vehicle

STEP 04:

With pull plunger fully retracted and locked in open position, slide each bag onto mounting plate fully. Unlock plunger to lock bag onto mount. This may take a few times to understand the function of the plunger. Plunger has multiple locking positions.

Note: Be sure plunger is fully retracted into open position for installation and removal as damage may occur to coated surfaces.
